EXTENDED: June 11, 2023
(Early applications encouraged!)

SEEKING SCIENCE- AND TECH-MINDED STUDENTS

The National Radio Astronomy Observatory is looking for up to 20 young adults to join our **ONLINE** ham radio project:

“Exploring the Electromagnetic Spectrum.”

From **August 7, 2023-May 13, 2024**, for *3-6 hours each week*, selected students will gain hands-on experience while learning about the electromagnetic spectrum and how it is used in STEM fields. Participants will also receive training to help become an FCC licensed amateur radio operator!

BENEFITS:

- \$4,000 stipend (\$100 week for 40 weeks)
- Weekly meetings with dedicated mentors
- Long-term networking opportunities with NRAO programs and amateur radio clubs
- Opportunities to attend conferences and apply for paid summer research experiences!
- Hands-on experiences!

QUALIFICATIONS:

- Must be 18-20 years old as of August 7, 2023
- Must be a US Citizen or a permanent resident
- Demonstrated interest in STEM
- Access to a computer or smart device; all other equipment will be provided
- Students from either BIPOC and/or LGBTQIA+ communities are especially encouraged to apply!
